

C. Charan Jetty

Computer Science Undergraduate – AI/ML & Backend Development

charan.jetty.c@gmail.com | +91-9052204445 | linkedin.com/in/charan-jetty-492536262 | github.com/Charanjetty

Professional Summary

Computer Science undergraduate (2022–2026) specializing in AI/ML with 1+ years of internship experience across machine learning, generative AI, and Java backend development. Proficient in building end-to-end ML pipelines, deploying Generative AI applications on Google Cloud (Vertex AI, Gemini), and developing modular Java components following OOP and SOLID principles. Selected for the WISER Quantum Computing Program Phase 2 (top 3,000 of 65,000+ applicants); Google Cloud Diamond League achiever with 7,373+ points.

Education

Siddharth Institute of Science and Technology, Puttur, Andhra Pradesh

B.Tech in Computer Science and Engineering (AI & ML) CGPA: 8.5/10

Technical Skills

Languages: Python (Intermediate), Java & OOP, HTML, CSS

AI / Machine Learning: Deep Learning, Convolutional Neural Networks (CNN), scikit-learn.

Backend & Frameworks: Flask, Django, REST APIs, FAST APIs.

Cloud & Databases: Google Cloud Platform (GCP), Vertex AI, MySQL, PostgreSQL(basics)

Tools & Version Control: Git (Basics), GitHub, Streamlit

Soft Skills: Problem Solving, Analytical Thinking, Collaboration, Clean Code Practices

Professional Experience

Java Backend Intern · Kingdom Training — Bangalore, India

Java, Spring Boot, OOP, Git

- Developed 5 modular Java components following OOP and SOLID principles, reducing code duplication by 35% in the training platform codebase.
- Optimised 3 backend algorithms improving runtime efficiency by 40%; authored JUnit 5 unit and integration tests achieving 80%+ code coverage.

AI & Generative AI Intern · IBM & SmartBridge — Remote, India

Python, Google Gemini API, Vertex AI, Scikit-learn, Streamlit

- Built and tuned 3 end-to-end ML models (classification + regression) achieving 88%+ accuracy through cross-validation and hyperparameter optimisation.
- Implemented a Generative AI document summarisation pipeline (Gemini + Vertex AI), reducing manual review effort by 70%; deployed as a production Streamlit application.

Commodity Price Forecasting · Way2Agri — Remote, India

Django, Python, XGBoost, REST APIs, PostgreSQL, OpenAPI 3.0

- Forecasted 12 commodity prices at 92% accuracy trained on 5+ years of historical data; delivered 6 Swagger-documented REST APIs consumed by 3 prototype integrations.
- PostgreSQL indexing reduced query load time by 3x; 7/30-day forecast charts reduced manual analysis effort by 80%.

Java Developer Intern · Vault of Codes — Remote, India

Java, Core Java, OOP, Git

- Delivered 3 production-quality Java modules (CRUD, exception handling, file I/O) on schedule; resolved 15+ logical errors in team code walkthroughs.
- Improved internal code-quality score from 68% to 91% through clean-code refactoring and iterative peer reviews.

Projects

Agro Intelligence

Python, scikit-learn, Flask, HTML5/CSS3, GCP

- Built an ML dashboard for crop planning and disease risk prediction using supervised learning on historical agricultural datasets.
- Evaluated 4+ ML algorithms, optimising the inference pipeline to achieve an accuracy baseline above 85% while reducing model response latency for near real-time decision support.
- Designed a modular preprocessing-training-serving pipeline, exposing predictions via a Flask REST API consumed by a web dashboard.

CleanTech Waste Classifier

TensorFlow, CNN, Transfer Learning, Python, Flask

- Developed a multi-class image classifier for automated waste sorting using transfer learning (MobileNet), targeting 6+ waste categories.
- Curated and pre-processed the training dataset; iterated on architecture and hyperparameters to improve classification accuracy.
- Deployed the model via a Flask web interface, enabling real-time image upload and prediction for end users.

Alert Herd — Stampede Detection System Python, Video Analytics, ML

- Prototyped a real-time crowd anomaly detection system at a hackathon, using video analytics to flag potential stampede conditions.
- Led backend logic for frame processing and motion/activity feature extraction; streamlined the pipeline to reduce CPU/memory utilisation and maintain stable low-latency execution under resource constraints.

Certifications

- **Google Cloud (2025–2026):** Introduction to AI & ML on Google Cloud · Engineer AI Agents with ADK · Develop Gen AI Apps with Gemini & Streamlit · Build Real World AI Apps with Gemini & Imagen · Build a Certification Study Guide: PMLE · Gemini for Application Developers · Gemini for End-to-End SDLC · Introduction to Generative AI · Prompt Design in Agent Platform
- Google Generative AI: Gemini, Vertex AI & Streamlit App Development (2025)
- NASSCOM Essentials of Solution Development in IT — Score: 91/100 (2024)
- **Anthropic:** Claude 101 · Claude Code 101 · Claude AI Fluency: Framework & Foundations
- University of Maryland — Smith School of Business: AI & Career Empowerment (*In Progress*)
- **Google Cloud Skills Profile:** Diamond League — 7,373 Points

Awards & Achievements

- **WISER Quantum Computing Program:** Selected for Phase 2 from 65,000+ applicants (top 3,000 nationwide); affiliated with Amaravathi Quantum Valley & QubiTech.
- **NASSCOM Recognition:** Scored 91/100 in Essentials of Solution Development in IT (2024).
- **Hackathons:** Participated in HackWithHyderabad, amBITion 2.0 (BIT Mesra), and Google Cloud Agentic AI Day.
